

Sakra Hospital Chatbot Benefits Report

The Sakra Hospital Chatbot serves as a 24×7 virtual assistant that enhances patient experience, reduces staff workload, and improves hospital efficiency through automation and intelligent responses.

1. Usefulness for Patients & Visitors

Benefit	Description	Example
24×7 Instant Help	Provides round-the-clock support to patients.	"What are the emergency contact numbers?"
Find Doctors Easily	Helps locate doctors by department or specialty.	"Show cardiologists available today."
Book Appointments	Enables booking directly through chat.	"Book an appointment with Dr. Ramesh tomorrow."
FAQ Support	Answers common questions instantly.	"Do you have cashless insurance?"
Navigation Assistance	Guides users to hospital areas or labs.	"Where is the radiology department?"

2. Usefulness for Hospital Staff

Benefit	Description
Reduces Call Volume	Handles repetitive queries automatically.
Collects Patient Info	Gathers data before connecting to human staff.
Provides Analytics	Shows insights on common patient queries.
Integrates with Systems	Connects with hospital CRM or appointment systems.

3. Usefulness for Hospital Management

- Improves patient satisfaction and experience.
- Reduces operational costs and increases efficiency.
- Provides data-driven insights and reports.
- Enhances the hospital's modern, tech-driven image.

Summary:

The Sakra Hospital Chatbot functions as a digital receptionist, patient guide, and service assistant — all in one. It saves time, increases patient satisfaction, and helps staff focus on critical tasks. This makes it an essential digital tool for modern healthcare environments.
